

2025 Alluma preventive drug list - Standard Plus

This list provides examples of commonly prescribed preventive medications. It is not an all-inclusive list; however, many examples of medications are listed in each category.

This list does not guarantee coverage. Please check with your plan administrator and/or benefit information materials if you have questions on coverage. Formulary and other plan restrictions may still apply. Your cost share will be determined by your plan's drug coverage. Coverage prior to the deductible being met may not be provided for every dosage form of a listed medication. Individual plans may vary.

Please note: When feasible, brand names are shown in capital letters in each category. If a generic is available, it is listed in lowercase next to the brand name. If only generics are available (for example, brands may no longer be available), they will only be listed in lowercase. Coverage under the preventive benefit generally includes only generic medications and brand medications with no generic equivalents.

The Internal Revenue Service (IRS) guidelines for health savings account (HSA)-eligible high deductible health plans (HDHPs) allow coverage of certain preventive drugs prior to meeting the deductible. Alluma is not a tax advisor and does not represent or warrant that this list complies with IRS guidance or other applicable legal requirements. Health plan sponsors should seek the advice of legal counsel or a tax professional before adopting this list.
